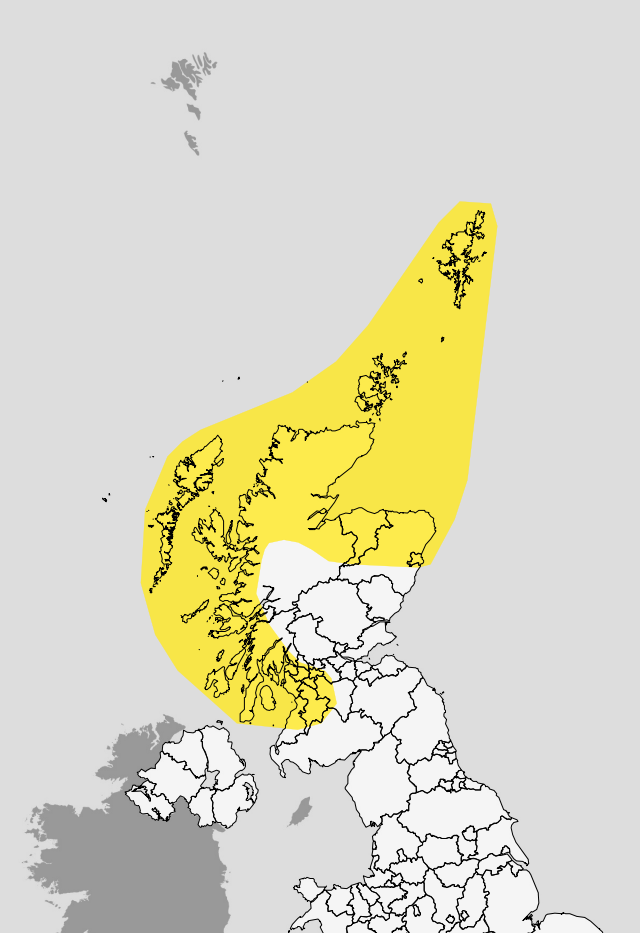
Yellow warning
Snow & Ice

Between
09:34 Fri 10 Mar 2023 and
09:00 Sat 11 Mar 2023



Further snow showers are likely to lead to some travel delays and slippery surfaces

What to expect

- Some roads and railways likely to be affected with longer journey times by road, bus and train services
- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

Snow showers will continue to affect the Northern Isles and the north of mainland Scotland through today, giving a few cms of lying snow in places. A more organised band of snow showers is expected to move south across northern Scotland this afternoon and evening, with showers becoming confined to northern and some western coastal areas overnight. Accumulations will be variable depending on where showers fall, but some places may see 2 to 5 cm of snow. With a partial thaw of lying snow by day, there is an additional ice risk where this then freezes again overnight.

Medium likelihood of low impacts

Issued at 09:34 Fri 10 Mar, 2023
